How we worked

Mural for alignment. GitHub Projects for execution.

Mural

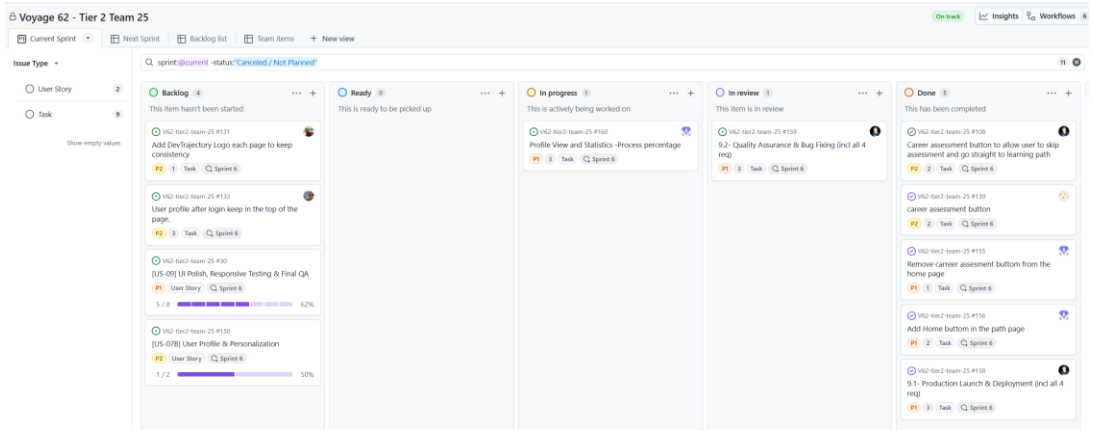

Scrum
Planning · Refinement · Review · Retrospective

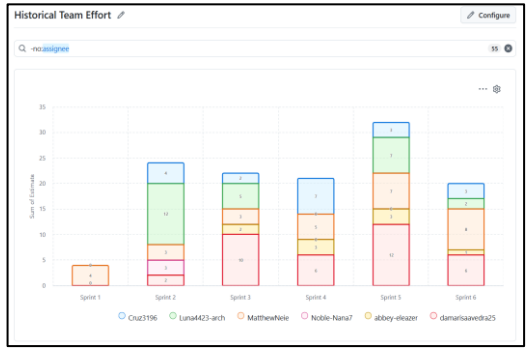

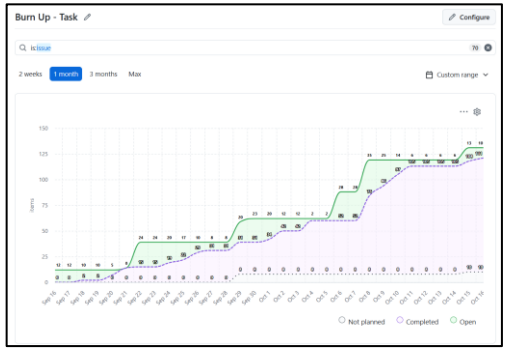

GitHub Projects

Build · Track · Deliver

Tasks, priorities, estimates, Sprint status and Pull Request visibility

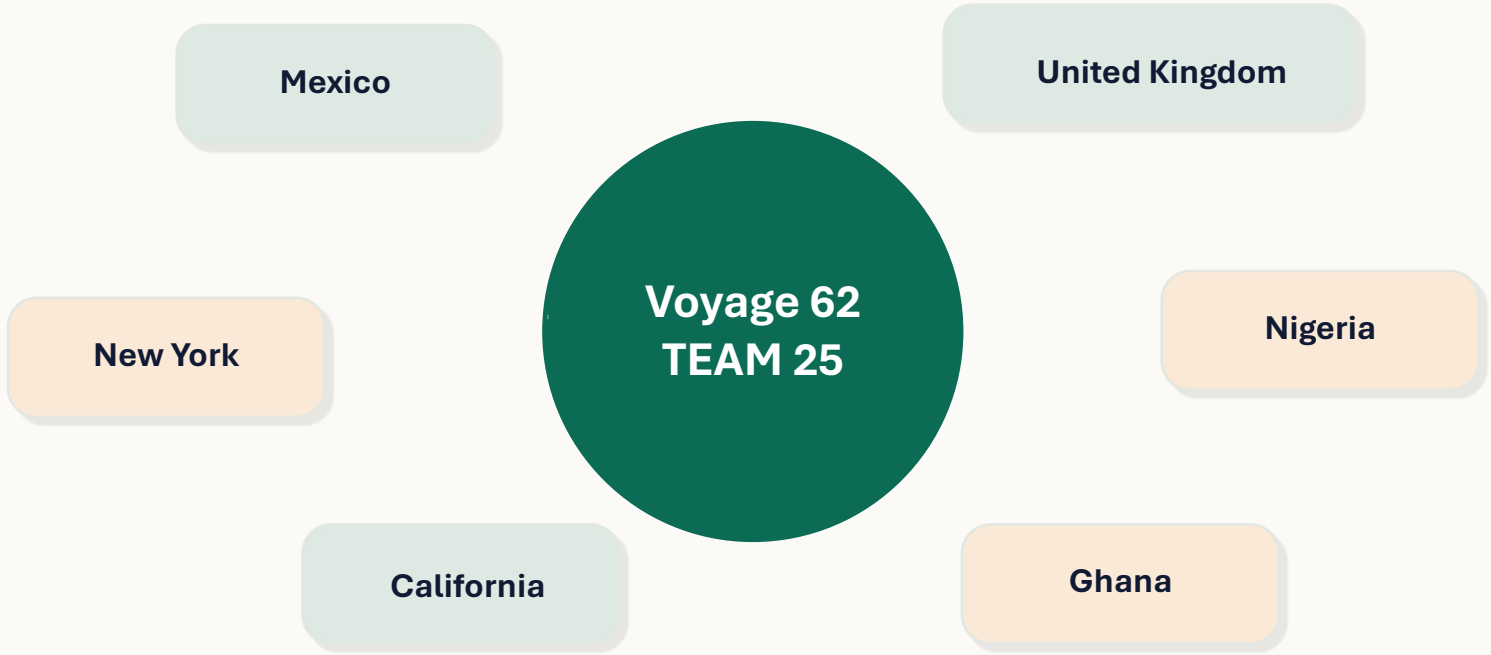

Our biggest challenge wasn’t the code.

It was collaboration.

Alignment could not be assumed — it had to be built.

Time zones

Cultures & perspectives

Experience levels

What we learned

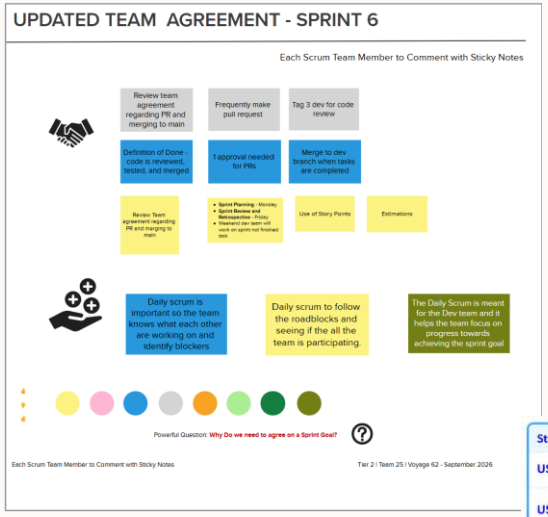

The process changed how we worked together — not just what we built.

01 Scrum Structure, inspect & adapt

02 GitHub Visibility & collaboration

03 Communication Alignment before execution

04 Problem Solving Adapt, decide, move forward

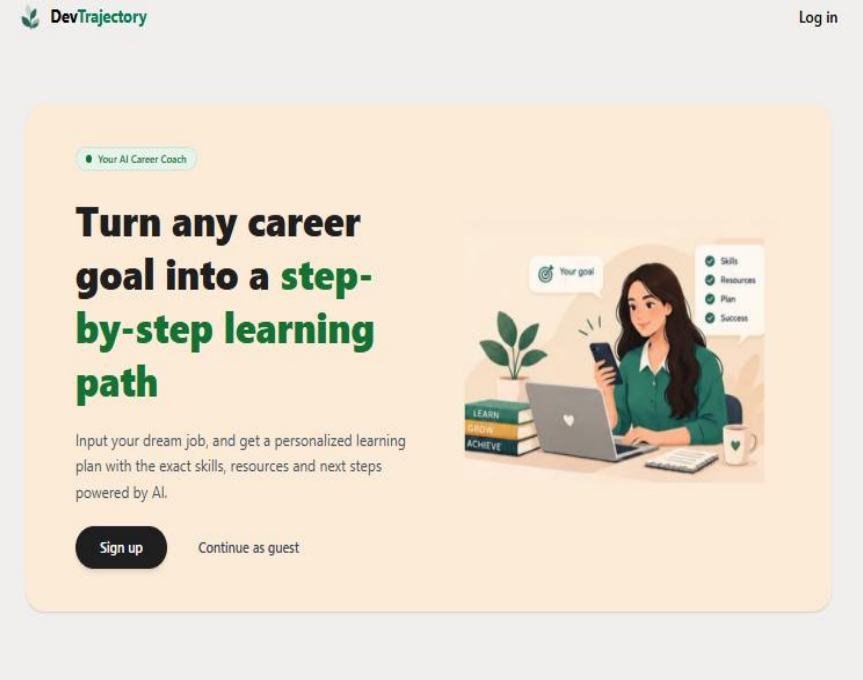

Story ID	Story Title	Target Sprint	MoSCoW / Delivery	Scope & Core Focus
US-01	Landing Page & Guest Navigation	Done Sprint 1 (Done)	Must Have / MVP	Landing page layout, value proposition, and "Login as Guest" navigation.
US-01A	UI Polish & UX Improvements	Done Sprint 2 (Done)	Must Have / MVP	UI polish, layout cleanup, spacing and alignment improvements, clearer visual hierarchy, and improved overall user experience.
US-02	User Input Form, State & Field Validation	Done Sprint 3 (Done)	Must Have / MVP	Form UI ("Let´s map your path"), field validations (Email, Career Goal, Time Commitment), inline error handling, and state storage.
US-02B	AI API Integration & System Feedback	Done Sprint 4 (Done)	Must Have / MVP	Gemini Flash 1.5 API connection, fallback logic ("Beginner" default), loading spinner, and error handling.
US-06	User Authentication (Sign Up & Log In)	Done Sprint 4 (Done)	Must Have / Team MVP	User registration, login UI/forms, auth flow, token/session handling.
US-03	Learning Path Display & Milestones	Done Sprint 5 (Done)	Must Have / MVP	Render structured AI output into timeline modules, milestone cards, and recommended resources.
US-04	Progress Tracking & Interactive Checkboxes	Done Sprint 5 (Done)	Must Have / MVP	Allow users to mark milestones/tasks as complete, with dynamic progress indicators.
US-05	Export & Share Learning Path	Done Sprint 5 (Done)	Could Have / Stretch	Export learning path to PDF via a PDF button. Markdown export and social sharing are out of scope.
US-07B	User Profile & Personalization	Done Sprint 6 (Done)	Could Have / Stretch	User profile page to view and update personal info, learning statistics, and access saved paths. Editable profile fields, save profile, and basic profile stats.
US-09	UI Polish, Responsive Testing & Final QA	Done Sprint 6 (Done)	Must Have / MVP Finish	Production launch, bug fixes, final QA, responsive testing, deployment readiness, README updates, and showcase presentation prep.
US-07	Saved Paths & History Dashboard	Canceled Canceled	Could Have / Stretch	User dashboard to browse, reopen, and delete previously generated learning paths.
US-08	Custom Milestones & Path Editing	Canceled Canceled	Could Have / Stretch	Allow users to manually add, edit, or remove custom steps inside an existing learning path.

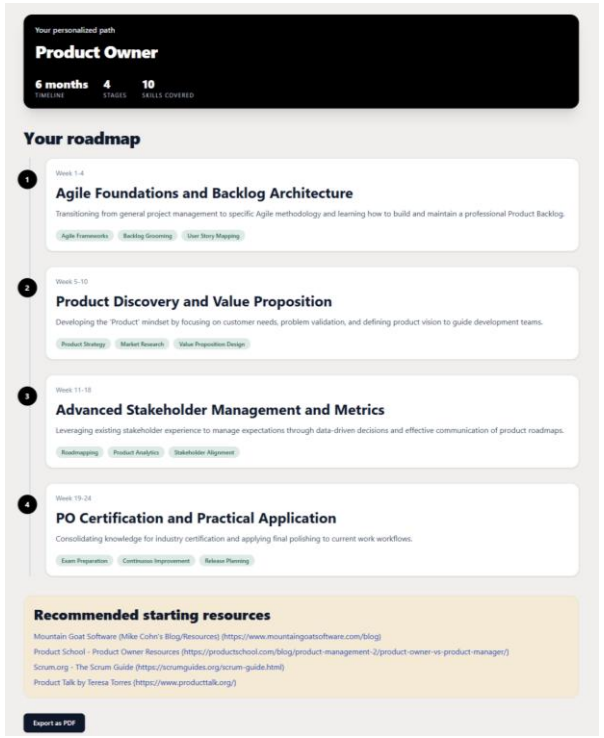

What we built

From a career goal to an actionable learning path.

DevTrajectory helps users turn a broad tech-career goal into a structured path they can actually follow.

AI-powered | Personalized | Actionable

Authentication	Google + email/password
AI journey	Assessment + Gemini path generation
Roadmap	Clear stages, milestones & resources
Progress	Interactive completion tracking
Profile	Editable learning information
Export	Print / Save as PDF
